

WELLNESS CENTER

DermaScan Skin Health Screening Event

**Make an appointment for a
DermaScan screening today!**

When: **August 2, 2016**

Location: **Wellness Center in room 4058**

At: **10am to 12 noon**

What is the DermaScan Screening?

Our skin is the first line of defense against pathogens, dirt, and the radiation energy of the sun. Several kinds of skin cancer is caused by solar UV radiation. The DermaScan screening uses safe fluorescent light and mirrors to identify areas of skin damage from the sun. Although the screening does not detect skin cancer, it can identify areas that could be "*cause for concern*" and a reason to follow-up with your doctor.

**To make an appointment, please contact Barbara Hayden,
RN, COHN-S at (202) 208-7057 or email
barbara_hayden@ios.doi.gov**
